Installation

ScandAll PRO V2

Be sure you log into Windows® as a user with administrator privileges.

1. Download "SAPV213.exe" onto your hard drive.
2. Quit any other applications that are running on your computer.
3. Execute "SAPV213.exe" that you downloaded in step 1. This creates a folder named "ScandAllPRO" in the same folder where the program is stored.
4. Double-click "ScandAllPRO.exe" which is located in the ScandAllPRO folder.
5. When the installation has completed, run ScandAll PRO and select [About ScandAll PRO...] from the "Help" menu of ScandAll PRO to bring up the "About ScandAll PRO" window. If the installed version of ScandAll PRO reads "ScandAll PRO Version 2.1.3", then the installation is successful.

Now that you have completed the installation, please refer to the  [README](#) prior to launching it.

ScanSnap Manager for fi Series

Be sure you log into Windows® as a user with administrator privileges.

1. Download "SSM4FI_107.exe" onto your hard drive.
2. Quit any other applications that are running on your computer.
3. Execute "SSM4FI_107.exe" that you downloaded in step 1. This creates a folder named "SSM4FI" in the same folder where the program is stored.
4. Double-click "SSMFFSetup.exe" which is located in the SSM4FI folder.
5. When the installation has completed, run ScanSnap Manager for fi Series, and right click ScanSnap Manager for fi Series Icon on the task tray. Select [Help] > [ScanSnap Manager for fi Series - version information] and confirm the version reads "1.0.7".

Now that you have completed the installation, please refer to the  [README](#) prior to launching it.
